FRIDAY, JULY 29

For prize lists, fair bills or other particulars, address communications to the secretary, J. P. Rorabeck, Oyen.

Threatening Weather Clears and Large Crowd Attends Sports

The weather was cloudy and threatening this morning and did not look very promising for the sports today, but the sun came out and shone brightly through the afternoon and a big crowd soon gathered to witness the sports provided. Visiting ball teams are present from Almont, Aoudia Valley, Sibbald, Cereal and Chinook, and should provide good entertainment. A number of visiting soft ball teams, including a men's team and a girls' team from Mareau, promise to give a good account of themselves.

OBITUARY

PETER K. UDSETH

The death of Mr. Peter K. Udseth, of Cappon, Alta., occurred at Holy Cross hospital, Calgary, Friday, July 1, 1932. The body was brought to Oyen and a funeral service was conducted in Oyen United church at 11 a.m., Saturday, July 2, 1932. Rev. E. F. Knapp, officiating, assisted by Mr. Otto Rolis. Burial followed at Sunnydale cemetery at 2 o'clock in the afternoon, Mr. Rolis conducting the last rites at the graveside.

Mr. Peter Udseth, who died in his forty-sixth year, was born in Hittren, Norway. He was one of the pioneers of Cappon district, taking land there in 1912. On April 4, 1917, he married Alma Dalebo, at Elks Point, South Dakota.

He was a great lover of children and no young people's function held in his district seemed complete without him. His kindness on many occasions and the interest he took in their pleasures and welfare, will be gratefully remembered by many of his young friends.

His passing came as a profound shock to his friends. About three weeks before his death he was not feeling well, and a week later went to Calgary for an operation for appendicitis. His case at the time was considered critical, but he appeared to show signs of improvement as the days went by when a sudden collapse brought about his death.

The following friends acted as pallbearers: E. Berg, Carl Carlson, Joe Odden, Frank Logan, A. K. Lee and Floyd Horn.

Good Progress Being Made In Extraction Of Radium From Great Bear Lake Pitchblende

Investigation into the treatment of the Great Bear Lake pitchblende ore is now being actively carried on by the Ore Testing Division of the Mines Branch, Department of Mines, Ottawa, under Mr. W. B. Timm, chief of the Division. It is learned that progress is very satisfactory, and remarkable headway has been made considering the nature of the investigation and the small staff available for the work.

After preliminary investigation of all the known processes, Mr. Timm states, work was confined during February and March to one which seemed to be the most adaptable to the treatment of this particular ore. Now, the investigation has progressed from small laboratory work to pilot-plant scale, and some six trial runs have given encouraging results. The pilot-plant scale on which the work is being conducted is approximately one-tenth the size of an ordinary commercial unit, calculated to give all the data with respect to operation and costs of a full size unit.

Extractions of radium from the ore have been well over 90 per cent. Last test made giving 97.96 per cent. This, however, is on one type of ore, and, as the process is entirely a chemical one, other types may give variations in treatment, but not give such good results. No results, therefore, can be released for publication until all types of ore have been tested. The property have been thoroughly tested, and a satisfactory treatment worked out which can be embodied in a commercial treatment plant.

For some years only high grade pitchblende will be shipped from the Great Bear Lake property, i.e., ore containing above 40 per cent. of uranium. Later, the cobblet grades and the low grade ore will, no doubt, be concentrated at the mine to shipping grade, and the treatment plant will be erected in the most favourable position from the standpoint of the cost of chemicals. As it takes three tons or more of acid to the ton of ore, the advantage of shipping the ore to the supply of chemicals will be readily seen.

Last there are any misunderstanding as to the meaning of the word "concentration" when applied to the treatment of pitchblende ore, the extraction of radium, it should be pointed out that the concentration of the radium is distinct from the concentration of the pitchblende in the ore. The latter will no doubt, be done at the mine when it becomes necessary to carry out this operation.

The concentration of the radium is that part of the chemical process in which the radium in solution is precipitated with barium, resulting in a radium-barium sulphate concentrate. These unacquainted with the topography and general characteristics of the Great Bear Lake territory, may be interested to know that the lake itself is the largest one contained entirely within Canadian boundaries, and the fourth largest on the American continent.

It covers an area of 28,000 square miles, compared with 31,610 square miles for Lake Huron, 22,400 for Lake Michigan, and 11,170 for Great Slave Lake. Its greatest length is 196 miles and its width about 110 miles. Its elevation has not yet been accurately measured, but it is approximately 360 feet above mean sea level. Its depth varies up to 75 fathoms, or 450 feet, placing its floor below sea level.

Great Bear Lake has long been known through the descriptions left by early explorers, particularly Franklin, Deane and Simpson, who made this lake their headquarters in the exploration and mapping of the Arctic Coast, but it is only recently come of economic importance. In 1920, oil was discovered on the Mackenzie River in the vicinity of Norman, where Great Bear River discharges the waters of the lake. The charges the waters of the lake.

Chief: "We have forgotten to stamp the letters."
Boy: "What idiots we are!"—Humor, Madrid.

Shrank stopped his motor car at a desolate crossroads and yelled to a farmer who lay on a cot of fertilizer: "Hey, Cornelli, is this the way to Croynod?"

The farmer raised himself from the fertilizer in astonishment. "By heck, stranger, how did you know my name is Cornelli?" he asked. "I guessed it," said the motorist. "Then, by heck," said the farmer as he drove on, "guess your way to Croynod."

When Time Flies
The advance of age is at first unperceived, but is nevertheless certain and rapid; and when it is realized it seems to approach almost with speed of light, and life at last seems to end soon after its commencement.

Ten leaves are plucked from a plant every seven or eight days.

Control of Tuberculosis

Medical Profession Claims Disease
Can Be Eradicated in Civilized
Communities

Dr. Norman Bethune of the Royal Victoria hospital, Montreal, told interviewers recent developments in treatment of tuberculosis have convinced the medical profession the disease could be entirely eradicated in civilized communities where proper methods of control were applied.

Dr. Bethune said latest forms of treatment have refuted the previously held opinion that climate was a factor in the disease. It is no longer necessary, he said, for persons suffering from tuberculosis of the lung to take long trips in search of sunshine and dry air.

Tuberculosis, he continued, is positively curable in cases where it is detected early and even in cases where it has made considerable progress in the lungs.

Recently developed method of collapsing the affected lung by filling the chest with water, and pumping it through a hollow needle has been improved by technique for elimination of adhesions of the lung to the ribs or chest wall, he said.

**Holiday Spoiled For
New York Visitors**

Found June Not Good Time for
Skiing in Quebec

The green garb of summer may be a delight to some of Quebec's visitors but it was a pain in the neck to four young women from a small New York town. Blushing with humiliation and smarting under the ill-coated laughter and grin of Quebec, the four vacation girls did their best to hide three pairs of brand new ski suits brought up with them. "Stinky water sports costumes would not see the light of day either."

Appropriately equipped for two weeks in the bracing northern air of Canada, the girls got a nasty shock when they were ushered into a country-side nodding drowsily under a warm summer sun.

Defends Legion

President of Ontario Canadian Taxes
Issue With Published Reports

Taking strong line with published reports alleging existence of "frauds" in connection with pensions, Col. F. J. Pickering, of Toronto, president of the Ontario command of the Canadian Legion, declared the impression was thereby given that many secured pensions by misrepresentation.

He told district members of the Legion that "fraud allegations were made public in a manner calculated to bring into disrepute ex-soldier citizens and their organizations."

Alberta Wheat Pool

Decided Mean to Continue Under
Present Marketing System

Alberta wheat pool will continue operating this summer under its present marketing system, it was announced at Calgary.

Pool officials decided not to ask a plebiscite this year among the membership for alternate methods of marketing, the announcement said.

In a resolution passed at the annual meeting of the pool, it was suggested that a plebiscite be held. Directors, however, decided it was inadvisable to hold the vote at present.

Exportation of currency and negotiable papers without permit has been prohibited in Uruguay.

Winnipeg Newspaper Union
Creative Unemployment

Gross earnings of Canadian railways for March totalled \$25,000,000, as against \$30,000,000 for March of last year. But as operating expense in March, 1931, were but \$22,500,000, compared with \$27,500,000 in March, 1930, the net position remained unchanged.

Many may ask how the railways could manage to get along in March of this year with \$5,000,000 less of operating expenditure than in March, 1931. They may think that the railways must have been wasting a lot of money last year, or spending it unnecessarily.

The real facts, perhaps unfortunately, are quite different. In March, 1930, the number of railway employees was 145,997, with a payroll of \$19,000,000. In March, 1931, the number of employees had dropped to 124,000, the payroll declining to \$15,000,000.

Thus, while the railways saved a lot of money last year, it was at the price of 20,000 railwaymen being dropped from employment, with a monthly loss of \$4,000,000 in purchasing power.

That the circumstances being what they are, helped the railways, but it wasn't much of a help to Canadian workers. The great trouble about unemployment is that it creates unemployment—Ottawa Journal.

Baroness Visiting Canada

Belgian Sportswoman Expects To Use
Rifle, Fishing Rods More Than Gun

Rifles, fishing rods and cameras form the main part of the equipment brought to Canada by Baroness C. de Belding, Belgian sportswoman and hunter, who is at home with a gun or a paddle in her hand, and who has come this year for the purpose of doing a lot of photography, perhaps getting a moose or two and fishing mackinaw as much as possible.

The Belgian huntress admitted that she loved to hunt and fish, and that she had had some wonderful shooting during the past winter on her father's estates in Algeria. She was looking forward to the expected trip to Canada with a camera and a gun.

I hope to take quite a lot of pictures of moose and their families, but I shall also get an exceptionally fine animal, I may try to "bag" him, if the season is open," declared the tall, slender woman, who looks more like a huntress than a woman who has been hunting since 1918.

Baroness Belding declared that she had not had a single close escape, and her adventure had not yet come her way.

Sugar Shortage In Russia

Reductions In Rations and Increase
In Price

A serious sugar shortage has resulted in a reduction of the sugar ration from 3½ pounds a month for each person to 1½ pounds for the white collar class and two pounds for the workers in Moscow.

Simultaneously the price has been boosted from 10 to 15 cents a pound in the foreign stores, which take only the foreign money. In the ration stores the price remains unchanged at 2½ cents a pound.

Soviet citizens of Moscow cannot buy candy despite the recent removal of confectionaries from the ration category, indicating that the candy manufacturers are feeling the shortage.

Housewives Need Sunshine

Old Sol's rays have taken a prominent place among the natural medicines. But it's the housewives, those busy creatures who are most likely to suffer from confinement and a lack of health-giving sunshine. They are advised to forget about wiping off those last few specks of dust on living room furniture—and even leave a bed or two unmade, if necessary, in order to get out in the fresh air in summer time.

New Idea For Speed

A method of nearly doubling the speed of water craft up to 50 feet in length by reducing resistance instead of increasing power was reported by the American Society of Mechanical Engineers, meeting at Yale.

There was a substantial gain in the Prairie Provinces wool clip last year. Alberta clipped 4,551,000 lbs., Saskatchewan, 1,605,000 lbs., and Manitoba, 1,292,000 lbs. Total 7,451,000 lbs.

"My wife is always shining with pain."
"Have you no remedy for it?"
"Rahner! I start my ears with cotton wool."—Karikaturen, Oslo.

On a lofty plateau, 2,300 feet above sea level, which forms the summit of Riding Mountain, covered with luxuriant growth of forest and set with exquisitely clear lakes, lies Manitoba's great scenic playground—Riding Mountain National Park. Hundreds of elk, bear, and moose roam wild within its boundaries; wildfowl and beaver build their homes along its waterways; while a herd of bison, descendants of those wild herds which once roamed the prairies of Manitoba, browse on the rich buffalo grass of its uplands. Here, Manitoba found its park ready-made and for years, long before the project of a national park was mooted, it has been the summer playground of people from all parts of the province. Its easy accessibility by rail or highway, and the fact that it lies within a day's ride or less of many of the province's cities and towns, ensure it a maximum of use both by the people of Manitoba and visitors from outside the borders. Now, with adequate conservation and orderly development, it is fast becoming a playground for the summer months—a place of rest and refreshment.

One of the greatest charms of the park from the scenic point of view is the number of beautiful little lakes which nestle between the ridges, in hollows made by the glaciers. It lies within a day's ride or less of many of the province's cities and towns, ensure it a maximum of use both by the people of Manitoba and visitors from outside the borders. Now, with adequate conservation and orderly development, it is fast becoming a playground for the summer months—a place of rest and refreshment.

On a lofty plateau, 2,300 feet above sea level, which forms the summit of Riding Mountain, covered with luxuriant growth of forest and set with exquisitely clear lakes, lies Manitoba's great scenic playground—Riding Mountain National Park. Hundreds of elk, bear, and moose roam wild within its boundaries; wildfowl and beaver build their homes along its waterways; while a herd of bison, descendants of those wild herds which once roamed the prairies of Manitoba, browse on the rich buffalo grass of its uplands. Here, Manitoba found its park ready-made and for years, long before the project of a national park was mooted, it has been the summer playground of people from all parts of the province. Its easy accessibility by rail or highway, and the fact that it lies within a day's ride or less of many of the province's cities and towns, ensure it a maximum of use both by the people of Manitoba and visitors from outside the borders. Now

WORLD HAPPENINGS
BRIEFLY TOLD

James W. Douglas, Edmonton, has been appointed stipendiary magistrate for the Northwest Territories.

Lady Eaton of Toronto, back in Canada after an extended visit abroad, told an interviewer in Winnipeg that Canada is doing too much worrying about the depression.

New York motorists paid approximately \$3,000,000 during the past decade to run red lights, talk back to motorcycle cops and drive the wrong direction on one-way streets.

An issue of the Canada Gazette contains a proclamation designating the Waterloo Lakes National Park as a part of the Waterloo-Glacier International Peace Park.

Canada stands third in the public ownership of railways. India is first with 41,724 miles of road. Germany second, with 42,400, and the U.S., 42,222, including federal, provincial and municipal.

Atlantic salmon eggs are being exchanged with the state of California by Dominion authorities for a corresponding number of steelhead salmon eggs to be used in stocking British Columbia waters.

One hundred years ago in June, 1852, the Dominion of Canada extended the rights of citizenship to the Jews of the Dominion. Jews all over the Dominion celebrated the centenary of emancipation.

The British gunboat "Moorhen" was bombed by mine-layers by Chinese seaplanes sent by General Chai-Tung to recover a quantity of munitions captured by Admiral Chai Chai, rebel commander of the Chinese navy, but she was not struck.

United Drilling Company of Calgary will commence drilling for crude oil in the heart of Alberta's "bad lands" where dinosaurs roamed millions of years ago. Vancouver agent is backing the venture and W. D. Marjoribanks, Vancouver, is heading the company seeking crude oil.

While screening gravel at the Hudson Bay railway yards at Churchill, George McDonald, machinist, found an old coin of the reign of George the Third. The coin is thin, and somewhat worn. The gravel from which the coin was taken, came from the shore of the bay. It is presumed it was lost by a sailor of one of the early expeditions.

Salvaging Lost Gold

Divers Are Brining Up Ingots From Sunken Liner

Brest, France.—Thirty ingots of gold, valued at \$1,000,000, were stored away in the hold of the salvage ship "Artiglio II," as divers, with renewed vigor, dropped into the sea to fish up the rest of the \$1,000,000 which went down with the liner "Egypt" ten years ago.

The \$1,000,000 which was clumped down on the "Artiglio" deck represents four years of dogged labor against the power of the storms and seas. Two stout ships have been lost in the quest and the lives of 15 men.

The tragedy of the past was mirrored in the dramatic scenes on the "Artiglio" deck which were brought up. There was a moment of silence in honor of the divers who were killed two years ago in the explosion which destroyed the "Artiglio I."

Paris, France.—The French salvage company, which first discovered the location of the hull of the liner "Egypt," from which \$1,000,000 was recovered by the salvage ship "Artiglio II," will claim part of the booty, Captain Jean Davy said in an interview with Paris-Midi, Paris newspaper.

A firm of shipowners wired one of their captains: "Move heaven and earth; get here on Friday."

Just as they were becoming very anxious they got the reply: "Raised hell, and arriving Thursday."

Rope or cord can now be made waterproof by a British process of impregnating it with rubber.

My brother lost his sight through drink.

It serves me the other way—I see double!—Gutierrez, Madrid.

More Prevalent in Cities

Common Cold Flourishes Best In Crowded Centres

That colds are associated with crowded cities public health officials have long suspected. Dr. Wilson G. Smith of Harvard now supplies the supporting evidence. In four isolated communities colds are caught only from outsiders. Spitzbergen's case is especially impressive. The miners of that most thoroughly communistic life and sleep in damp, hot barracks, work in drafts at temperatures below freezing, but catch no cold. When Dr. Smith concludes that the common cold must be attributed to an infection and probably to one that can be seen under the microscope we naturally ask if there is no germ that will impart immunity. He holds out no hope. Only the secondary infection may perhaps be thus controlled. The primary cold seems to be unquarable—the price we pay for swarming in cities.

A Perpetual Memorial

Late John Walter Superintended Work On Wetland Ship Canal

John Laing Weller is dead, but the Wetland Ship Canal will be a perpetual memorial to his work. Few Canadians were familiar even with the name of the man who was in charge of the construction of the greatest public work ever completed in the Dominion of Canada. Yet it was Mr. Weller who was on the job; it was he who was head of the surveys, design and carrying out of the big task from 1912 to 1917. When work was resumed in 1919 after the war, it was Mr. Weller who was made consulting engineer. For the last few years he has been on pension from the Federal Government.

Contract Bridge

By Hamlin R. Hatch, Cavendish Club, Toronto

In my previous article the methods of valuing the trick taking probabilities of hands were given. Today I will deal with the application of these principles.

It must be understood that in Contract it is the endeavor of the partnership in any particular deal, to tell as precisely and as definitely as possible the story of the twenty-six cards held by the partnership. For this reason, certain basic conventions are necessary and also certain definite formulae for card valuations. Both of these have been outlined in previous articles.

The opening bidder, under ordinary circumstances, opens the bidding when his hand contains three or four high honor cards, he thinks, under average conditions, "will take" two to three tricks in any declaration the adversaries may make. Also the opening bidder guarantees that, in case he is asked to partner, he will declare the bidding hand will take as a minimum, from four to five tricks, if the deal is played in the original declaration made.

There are nine tricks left for the three remaining hands, and that the opening bidder expects his partner to have at least three of these. Therefore when an opening bid of one is made normal expectancy by the opening bidder is three tricks. If the opening bidder is in his partner's hand. These three taking tricks are made up of the three kinds of tricks: i.e. High card tricks, long suit tricks and ruffing tricks.

It must be borne in mind that, in Contract, provided there is no interference bidding, the first response by the partner of the original bidder is the vital response. In other words it is upon the first response that the success or non-success of that particular deal depends. It is, therefore, of the utmost importance that the first response be precise. In any raise by partner of the original bidder's declaration, the raise must be given in full. As normal expectancy is that taking tricks, the full raise is the number of tricks above three that the hand contains. This works out as follows:—The original bid is one. This bid definitely informs the partnership that the bidding hand contains a minimum of from four to five taking tricks. The responding hand then figures the actual trick taking probabilities of the hand with spades trump. If the hand will take four tricks, then he raises the bid to two spades. If the hand will take five tricks he bids three spades and so on. In other words he gives partner a response corresponding to the number of tricks he has above three. The following example will explain this.

North
Spades J. X. X. X.
Hearts A. K. X.
Diamonds A. K. X.
Clubs K. X. X. X.

West
Spades X. X. Spades Q. X.
Hearts X. X. X. X. X. X. X. X.
Diamonds J. X. X. Diamonds Q. X. X.
Clubs Q. X. X. Clubs A. J. X.

South
Hearts A. K. X. X.
Spades A. X. X.
Diamonds X. X. X.
Clubs X. X. X.

The bidding—South is the Opening Bidder

S W N E
1 Spade Pass 3 Spades Pass
4 Spades Pass Pass Pass
In valuing North's hand the procedure is as follows:—

Half a trick for the four card spade suit.

Half a trick for the Jack of Spades.

One trick for the ability to ruff the third round of hearts.

Two tricks for the Ace, King of Diamonds.

Half a trick for the four card club suit.

Half a trick for the King of Clubs.

Spades trump. Normal expectancy is three tricks. Therefore North has two raises and bids three spades.

South's hand is valued as follows:—

Two tricks for the Ace, King of Spades.

Two tricks for the five card spade suit.

One trick for the Ace of Hearts.

One trick for the Ace of Clubs.

One trick for the Ace of Diamonds.

One trick for the Ace of Clubs.

One trick for the Ace of Diamonds.

One trick for the Ace of Clubs.

The Call of Moses

Golden Text: "Certainly I will be with thee."—Exodus 3:12.

Lesson: Exodus 3:11 to 4:30.

Devotional Reading: Isaiah 61:8.

Explanations and Comments

Called To a Great Task, Exodus 3:10.—"The biography of great men is not confined to public events. It is the incidents which are private, and describes the experiences which are spiritual and account for their spiritual results. Thus it was with Moses; we must be with him in the wilderness at the head of the host of Israel." At Horeb the call came to Moses to become the leader of his people, deliver them from oppression in Egypt, and bring them forth on their way to the Promised Land. He stood before a bush that burned and yet was not consumed.

"How clear is the anticipation here of what is now the accepted truth of physical science, that the energy of God is always expended in nature and in history, is never consumed and never destroyed."

"I have seen the affliction of my people." "I am come down to deliver them." "Come now therefore, and I will send thee to Pharaoh, that thou bring forth my people, the children of Israel out of Egypt."

With a flash of insight Moses knew that all this led him to the stupendous task of delivering his enslaved brethren in Egypt.

The way of his own. To the spirit which he has made. He lays his hand upon him, and the man realizes the realization that he stands summoned to that being to specific submission and definite service."

"And, as the path of duty is made plain, May grace be given that I may walk therein, Not like the hireling for his selfish gain, But cheerful in the light around me."

Walking as one to pleasant service led, For God's will as if it were my strength alone."—Whitfield.

Body Emits Violet Rays

Maya From Woman's Eye Destroys Yeast Cells

A woman's eye killed yeast cells simply by looking at them at Cornell University recently. This discovery, suggesting the "evil eye," but found due to an ordinarily harmless form of ultra violet rays given off by the eye. Bacteria generally was reported to the American Association for the advancement of science.

The experiments were described by Dr. Otto Hahn, of the Cornell Bacteriology Department.

The yeast cells—each a tiny particle—were laid on a glass slide. The woman placed her eye close, as in looking through a microscope. The cells died in a few minutes. Previous experiments with other parts of the body explain the lethal power in this feminine look.

For several years scientists have been reporting various discoveries that living things produce ultra violet rays. In the human body they were first found coming from working muscles, though not from resting ones. Then they were found in the blood and in carcinoma, a form of cancer.

The finger tip rays of several persons at Cornell killed yeast readily. Through quartz placed above the cells, the killing required about 15 minutes; without it two to five minutes. The quartz helped to show that the rays were not from the heat, but from the body itself.

The active search for it in western Canada has switched to Northern Alberta where three test wells are planned in the Athabasca area, by Eastern interests.

There is wide spread interest in the Island Lake district, Manitoba, on the part of mining men in all parts of Canada. Over 600 persons in this district were recently sent out by the Manitoba Chamber of Mines.

What Price

Accidents?

Burden Of Cost Falls On Just and Unjust Alike

The average citizen when he picks up the paper and reads about an automobile accident may feel a fleeting moment of sympathy for the victim, but he dismisses the incident from his mind as something that does not concern him personally. If he stopped to think, he would realize that every automobile accident involving injury or loss of life affects his pocketbook. Nearly every such accident calls for emergency hospitalization and this in its turn costs money.

To this cost must be added the expense of automatic claims, court and traffic squads. Insurance rates also increase. So that any one figures the matter out the burden of such accidents falls upon the just and the unjust alike.

In the year 1931 there were some 5,000,000 automobile accidents in the United States. Of these, 1,000,000 people killed or injured. This is too appalling to even comment upon. The destruction of life and property in the end touches everybody's pocketbook much more than the cost which the accidents involve. The sum total of all these charges should be great enough to make the people of the United States bend every effort to reduce automobile accidents.

FAIR SUCCESS ATTENDS LABORS AT LAUSANNE

Lausanne.—Despite the pessimistic forebodings of the past, the Lausanne Conference looks like achieving a measure of success in its gigantic task of solving the reparations and inter-governmental debt tangle that has Europe on the verge of a crash.

"Although I am sorry to say I cannot report to you we have got a complete measure of agreement, we have got, I think, agreements," Prime Minister Ramsay MacDonald, the chairman, guardedly commented at a meeting of the six principal powers at the conference.

These are the points on which all the principal powers, including France and Germany have finally agreed:

- (1) Adjustment of inter-governmental war debts and reparations should take place without delay if new disasters are to be avoided.
- (2) Steps are necessary to ensure the stability of the German currency.
- (3) The conference must do something substantial so far as possible, final, although it is recognized a final settlement has to be adapted to a world settlement which includes the United States.
- (4) The conference must end soon, and the settlement must be such as will render possible restoration of commerce.
- (5) Artificial transfers disturbing the international balance of accounts should only take place, at the normal operation of international commerce and should be limited to that capacity.
- (6) Germany cannot pay at the present time.

Grasshopper Plague

Hope That Red Tick Would Abate Nuisance Has Proven To Be Unavailing

Winnipeg, Man.—Hope that a tiny red tick, an attacker of grasshoppers, could aid Dominion and Manitoba agricultural departments in ridding the province's wheat belt of the worst grasshopper plague in 50 years, died today. The hope was too robust. Norman Cridde, head of the federal government laboratory at Trenton, N.J., said the little parasite attacks adult grasshoppers and do "about as much damage as a tick on a dog." If they contract the tick's activities to young "hoppers" they would be able to materially check the grasshopper advance, he said.

The government experts said the grasshopper outbreak in south Manitoba is the worst in the history of modern agriculture in western Canada, exceeded only by that which lasted from 1873 to 1875.

Heavy Penalty For Fraud

Five Employees Of Stores In Moscow Sentenced To Death

Moscow, Russia.—Five employees of Moscow's state retail stores were sentenced to death after a six-day trial on charges of defrauding the state of 1,000,000 rubles (nominally \$500,000) by theft, illegal raising of prices and by supplying speculators. Seven others were sentenced to ten years in prison and eight were sent to jail for three to five years. Three other defendants were acquitted.

Printing Jobs Go Abroad

London, Ont.—Charging that \$80,000,000 worth of printing for Canadian firms was done outside Canada in 1931, the Ontario-Quebec Conference of Typographical Unions trained its guns against this alleged condition. They will ask the Canadian Manufacturers' Association and other employing organizations to condemn the practice. The printing for some companies was done in countries as far away as Sweden, it was claimed.

Will Keep Present System

Calgary, Alberta.—Alberta, which pool will continue operating this summer under its present marketing system. Fuel officials decided not to hold publicistic this year among its membership "on alternate methods of marketing," the announcement said.

Presidential Election and Business

New York.—A study of stock market averages compiled by Warren M. Persons, economist, goes a long way toward showing that periodic speculative nervousness in the United States because of the proverbial presidential "year" has never been justified.

W. N. U. 1240

Free State Senate Passes Oath Measure

But Bill Almost Unrecognizable On Account Of Amendments

Dublin, Ireland.—The Free State senate passed the Republican Government bill to abolish the parliamentary oath of allegiance to the crown, but the measure has been amended so the bill is almost unrecognizable. It stands, the abolition of the oath cannot be inserted in the constitution of the Free State.

The government has no intention of accepting the measure in its present form," said Senator Joseph Connelley, Minister of Posts and Telegraphs. It would be the bill to the Dail Eireann "with the results that might be expected," he added.

This means the Dail may again pass the original measure, which after 18 months would become law despite the senate. The alternative is a general election in which the Republican Government would seek a concise mandate for abolition of the oath.

Deportation Case

Appeal To Supreme Court Of Canada Is Delayed

Halifax, N.S.—The appeal to the supreme court of Canada on behalf of alleged Communists held here for deportation will be held up at least a week until the government can secure the court of Nova Scotia, to consider the application for leave. When formal motion was made recently by A. H. Ryan, counsel for a group of the eight of the alleged Reds, C. B. Smith, K.C., representing the crown, appeared in opposition to the appeal.

The court continued the application for a week, and intimated that he might hear further argument from the crown.

The condemned men sought release under habeas corpus proceedings, but their action was dismissed by a supreme court judge and later by the full bench of the Nova Scotia supreme court.

Under New Regime

United Newfoundland Party Takes Over Reins Of Office

St. John's, Nfld.—This island domain, under control of the United Newfoundland party, with P. C. Alderdice, prominent St. John's business executive as prime minister, the Liberal administration of Sir Charles Anderson Squires, unelected in general elections of June 11, has resigned, and members of the new government were sworn in. Mr. Alderdice also took the portfolio of Minister of Finance and Customs.

Other members of the executive council are: J. C. Puddister, Secretary of Education; H. E. Ryan, Minister of Justice; H. A. Winter, K.C., James Ayer, Hon. F. McNamara, S. J. Poole, Harold Mitchell, John Stone.

Scalds Prove Fatal

Debate From Vancouver Attending Orange Gathering In Montreal

Montreal, Que.—John E. Carpenter of Vancouver, died in hospital here from injuries sustained when he was scalded in his hotel bathroom. He was believed to have been overcome by a scalding while drawing water for his bath and fallen into the water. He was 75 years of age.

Mr. Carpenter was in Montreal to attend proceedings of the grand lodge of British North America, of the Orange Order. Monday he was elected deputy grand master of the Black Knights. He was a past grand master of the order in British Columbia.

Opposition For Bracken

May Be Three-Cornered Fight At The Seat

Winnipeg, Man.—Premier John Bracken may have two opponents in the deferred election in the Pas on July 14. J. A. Campbell, Conservative, is to be nominated as a candidate for the seat and the Independent Labor Party moved to place a third man in the field. Hugh's Land also will elect a member on July 14. H. G. Beresford, government member in the last House, would run as a Bracken follower and probably will be opposed by Col. Arthur Sullivan, Winnipeg lawyer.

Heads National Council Of Women

Ottawa, Ont.—Miss M. Winifred Kydd, of Montreal, Canadian delegate to the Geneva disarmament conference, was re-elected unanimously to the presidency of the National Council of Women at a meeting held here. Mrs. C. R. Townley, Vancouver, was appointed convener of the national conference committee.

To Tour Canada

Group Of Empire Farmers On Visit To Dominion

Quebec, Que.—"To see and to learn" might be the motto of the group of empire farmers who arrived here on the liner "Empire of Australia." They spent two days in Quebec prior to starting on a trans-Canada tour.

Thirty-seven in number and including 15 women, the group of the party are all farmers or closely connected with farming, and represent the mother country, South Africa and Irish Free State. They are travelling under auspices of the British National Union accompanied by Arthur Canham, Secretary of the Union and former South African Trade Commissioner to Great Britain.

The party is composed of 12 members from all parts of South Africa, two from the Irish Free State and the remainder from England and Scotland. Among them are Daniel Crawford, former treasurer of the National Farmers' Union of England, and M. G. Viljoen, of Cape Province, South Africa, a former candidate of the Nationalist Party.

An Important Judgment

Ottawa Lumberman Awarded Full Amount Of Claim Against

Toronto, Ont.—In a judgment of far-reaching importance to brokerage houses D. B. Rochester, Ottawa lumberman, has won the full amount of his claim, \$162,108.38, against W. C. Solloway, Haywood Mills and the Solloway-Mills Brokerage Companies, represented by O. E. Lemay, assistant master at Osgoode Hall.

Rochester, who dealt with the brokerage firm for more than two years, is by this judgment, returned every dollar he ever invested with Solloway, Mills and Co. He is also allowed interest at five per cent. from December 19, 1929.

The condemned men sought release under habeas corpus proceedings, but their action was dismissed by a supreme court judge and later by the full bench of the Nova Scotia supreme court.

FARM MARKETING BOARD MAY BE APPOINTED SOON

Ottawa, Ont.—A commission to study and report on the feasibility of a farm marketing board was appointed by the Dominion Government in a few days it was learned here. It is reported that during his recent visit to the west Hon. Robert Weir, Minister Agriculture, went into the matter with western producers and dealers and that considerable progress has been made towards reaching a decision. The men who should form the commission.

It is planned that the commission would begin very soon to study the situation in order to be in a position to discuss the feasibility of a marketing board with exporters from other countries who will be here for the Imperial Conference. The object of the board would be to avoid slumps in prices whenever Canada went on an export boom and to protect the producer, bacon and other commodities in which the exportable surplus is small compared with the domestic demand.

DONS OVERALLS

Hon. Peter Heenan, former Liberal Minister of Labor, is going back to overalls as a locomotive driver and hopes to take the throttle this week. "It's my trade, and a good one," he said. "Besides, I have a family to support."

Judgment Reserved

Supreme Court Deals With Peter

Ottawa, Ont.—Judgment was reserved in the supreme court of Canada on the application of Peter Verigin, imprisoned leader of the Doukhobors of western Canada, for leave to appeal against a conviction in Saskatchewan for perjury.

William J. Green, Ottawa, counsel for the Province of Saskatchewan, appeared for the crown. Verigin was represented by P. G. Maharaj, Saskatchewan.

With a number of clashes between opposing counsel largely on points of law, arguments centered on proceedings at the time of conviction in the king's bench court of Saskatchewan. After a jury trial, Verigin was found guilty in the king's bench division and was given a term of three years in Prince Albert penitentiary. On appeal to the appeal court, the sentence was reduced to 18 months.

Prospectors Use Plane

"Flying Box-Car" Carries Equipment

Lac Du Bonnet, Man.—Prospecting in Manitoba entered upon a new phase when ten prospectors with 6,000 pounds of equipment, equipment and five cases, left here in one aeroplane for the Island Lake gold field, 200 miles north and on the Manitoba-Ontario boundary.

Their sky chariot was the huge Junkers of the Canadian Airways, the "Flying Box-Car." The machine was chartered by the Manitoba Chamber of Mines with the result that the ten prospectors can get into the field at a cost of about \$600 each, including equipment.

New Plans For India

London, England.—A comprehensive scheme for the future constitution of India, embodying both the aspects of federation and provincial autonomy, will be presented in a bill to be introduced in parliament by the British Government, Sir Samuel Hoare, Secretary for India, announced.

Duce Escort to a Queen

Il Duce is shown with Queen Helena of Italy, on one of the very rare occasions on which they have been photographed together. The picture was made during the recent visit to commemorate the fifth anniversary of Garibaldi's death in Rome. A monument to the wife of the national hero was unveiled at the Gianicolo as a feature of the celebrations.

Crop Conditions

Improvement In Western Provinces Is Indicated In Government Report

Ottawa, Ont.—Canadian crop conditions are much improved in the western provinces and distinctly lower in the maritimes and eastern Canada, as compared with last year. This statement is made in the government report on crop conditions issued June 28.

Western crops have maintained their condition fairly well, the report states, in a period of spotty rainfall and higher temperature. Likelihood of heavy damage from early rains is now past but grasshoppers are still dangerous and are particularly damaging in Manitoba.

In some large areas rain is needed to prevent crop deterioration, but generally the present moisture supplies are satisfactory.

In British Columbia, recent weather has been almost ideal with plenty of heat and rain. Hay is nearly completed. Cereal crops are looking fine.

Staging Wrigley Swim At Lake Waskesiu

All Entrants In Saskatchewan Event Must Be Amateurs

Saskatoon, Sask.—Permission has been granted to the Prince Albert Aquatic Club to stage the Saskatchewan Wrigley aquatic championship swim at Lake Waskesiu, Prince Albert National Park, Saturday, July 16.

In 1931 the Wm. Wrigley Jr. Company, of Winnipeg, presented for an annual competition two large challenges for the men's and women's provincial mile and swimming championships. Two members of the Moose Jaw Aquatic Club, Percy Reynolds and Phyllis Dewar were the 1931 winners.

All entrants must be amateurs and should apply to William Schen, of the Saskatoon Amateur Athletic Association, for entry forms.

Statues On Parliament Hill

Burnishing Up Statues At Ottawa For Imperial Conference

Ottawa, Ont.—Relieved of their mantles of green corrosion, statues on Parliament Hill of Queen Victoria and Sir John A. Macdonald will greet delegates to the Imperial Conference resplendent in experimental coats of burnishing.

After months of work, national research chemist prepared a solution to remove the marring corrosion. The varnish was applied in an attempt to prevent its recurrence.

NAME BRITISH DELEGATES FOR EMPIRE PARLEY

London, England.—Announcement of arrangements for at least four British cabinet ministers to attend the Imperial Empire Conference at Ottawa, in addition to Sir Philip Cunliffe-Liter, Secretary for the Colonies, will be in the cabinet, indicated that Stanley Baldwin would lead the United Kingdom's delegation.

Mr. Baldwin is Lord President of the Council and, at the moment, acting Prime Minister. He will be accompanied by Lord Halsbury, Minister of War; J. H. Thomas, Secretary for Dominion, and Walter Runciman, President of the Board of Trade, all cabinet ministers.

The Australian and New Zealand delegations have sailed for Vancouver from Wellington, New Zealand, and arrive in the Pacific Coast city on July 15. The conference opens July 21. Stanley Melbourne Bruce, Assistant Treasurer, and H. S. Gullett, Minister of Trade, head the Australian delegation, while New Zealand's principal representatives are J. G. Coates, Minister of public works, and Downie Stewart, Finance Minister.

The first of the sections of the combined British delegations, including the commercial and industrial advisers, leave London this week. Representatives of South Africa, India, Northern Rhodesia and Northern Ireland will take their departure from London.

Reports from Dublin shed little light on the Anglo-Irish dispute that is likely to prove embarrassing at Ottawa. In announcement that President Eamon de Valera would not attend the Imperial Empire Conference because of pressure of business, it was indicated the Free State delegation at Ottawa would confine itself to consideration of trade questions and Dublin indicated it did not expect the larger issue of the Anglo-Irish difference to arise.

DEMOCRATS WILL FAVOR REPEAL OF VOLSTEAD ACT

Chicago Stadium.—A plank putting the party on record for repeal of the 18th amendment and for immediate modification of the Volstead law was adopted by the United States Democratic National Convention.

Other high points of the 1932 Democratic pronouncement of policies included:

Refinancing farm mortgages; extension of co-operative marketing; effective control of crop surpluses; and endorsement of "every constitutional measure" to help farmers to get cost of production.

Regulation of interstate utility companies and stock exchanges, fuller generation of electric power, but no mention of the cash bonus.

Condemnation of the Hawley-Smoot Tariff Act and of "extraneous" by the Federal Farm Board.

A real contest developed in the committee against the tariff plank with opposition to the proposal of a "competitive tariff for revenue."

New Source Of Wealth

Investigate Possibilities Of White

Winnipeg, Man.—A new source of wealth from the Hudson Bay is to be developed under the auspices of the Manitoba Industrial Development Board. The sub-committee on fish by-products will bring six white whales here from the bay for sampling.

The committee has come to the conclusion there is a potential Canadian market for oil, meat and leather from the aquatic animals, and an overseas market is also thought to exist for certain of the oils which could be profitably exported to the Hudson Bay. After preliminary tests of the product are completed, samples will be sent to England, and a survey of the European market will be made by a representative of a Winnipeg firm.

A Cunningham, director of game and fisheries, who is chairman of the committee, hopes ultimately to see the establishment of a rendering plant, Churchill, see port on Hudson Bay.

Retiring Ages Set

New Ruling Applies To Members Of Royal Canadian Mounted Police

Ottawa, Ont.—For the first time since organization of the Royal Canadian Mounted Police, the retiring ages for all members have been set by order-in-council.

The order places the retiring age of constables at 45 years; deputy commissioner, 48; assistant commissioners, 60; superintendents, 62, and inspectors, 65.

For the senior constables, the retiring age is 57 years; staff sergeants and sergeants, 58, and other ranks, 55.

The order goes into effect immediately, but there are few, if any, members of the force who have reached the retiring age.

Send Up Test Balloons

Altitude Of 65,000 Feet Is Attained In German Experiment

Stuttgart, Germany.—Three test balloons carrying measuring instruments were sent up 65,000 feet under the direction of Prof. Erich Hegener, of the Technical University. The altitude was greater than that attained last year by Prof. August Piccard in his ascent to the stratosphere.

Each balloon was 15 feet in diameter and the three were hitched together 13 feet apart with the instruments in a gondola between them. They were hauled down after three hours.

Papal Legate Visits Belfast

Belfast, Northern Ireland.—No untoward incidents marked the visit here of Cardinal Lauri, papal legate at the Eucharistic Congress. It was through a quarter mostly inhabited by Nationalists that the prelate entered Ireland's ecclesiastical capital. The route was divided so that he would not have to pass through a Unionist district.

Sets Flight Record

Vancouver, B.C.—Making the flight from Winnipeg to Vancouver in one day, Pat Reid, noted Canadian pilot, landed at Sea Island airport. He stopped at Regina, Lethbridge and Grand Forks en route, and averaged 100 miles an hour.

OUR POLICY

THE policy of The Bank of Toronto has always been to build for strength and stability. It has had one dominant aim—to be a safe, secure depository for the public's funds. Today, assets of over \$123,000,000, deposits of over \$85,000,000 and reserves one-and-a-half times greater than capital—indicate the strength and soundness of The Bank of Toronto in the present trying times.

You are invited to make use of the strength and service of this Bank.

THE OYEN NEWS
JOB PRINTING DEPARTMENT

About Town and Country

Born—To Mr. and Mrs. R. Richardson, of Oyen, on Wednesday, June 29, 1932, a son.

Mrs. A. M. Babb, of Teeswater, Bruce County, Ont., and daughter Jean of Brantford, Ont., who were the guests of Mr. A. M. McQuarrie the fore part of last week, left last Wednesday, en route to their homes. Mrs. Babb is Mr. McQuarrie's sister.

A rattlesnake was recently killed on the R.C.M.P. property in Empress. In the pioneer days, rattlers were quite common at the river, but in recent years their appearance has been unusual.

Miss A. M. Todd left for her home in Chinook, last Friday.

The teaching staff of Oyen public and high schools has been re-engaged for another year. No reductions were made in salaries.

Rev. and Mrs. E. F. Kemp and children, returned to Oyen last Thursday evening, driving home from Vegreville. Both Mr. and Mrs. Kemp are much improved in health, and pleased to be home again.

Mr. and Mrs. George Langmuir and family, and Mrs. C. S. Wright and daughter Catherine, were Rosetown visitors July 1, returning to Oyen Sunday evening.

Mr. H. L. Packard returned to Stettler last Sunday.

Mrs. F. M. Ramsay and daughter Marjorie, of San Francisco, Calif. are the guests of Mr. and Mrs. E. Radtatz. Mrs. Ramsay is Mrs. Radtatz's sister.

Mr. and Mrs. J. F. Martin left last Friday for Camrose, Alta. Mr. Martin will afterwards go to Edmonton to mark examination papers.

Mr. and Mrs. Harvey Johnson and family, who left yesterday on a berry picking excursion to the river, returned home this evening. They report that berries were fairly plentiful.

Miss Josephine Brezden, who arrived in Oyen from Calgary last Sunday, is home for a two-weeks vacation.

Mr. and Mrs. Arthur Johnson and Dorothy, who have been away on a vacation, returned to Oyen Monday evening. While on their trip they visited Calgary, Banff, Cranbrook, B.C., Lethbridge and Medicine Hat. On their return home from Cranbrook, they were accompanied by Miss Elizabeth Johnson, Mr. Johnson's sister.

Mr. Maynard Regan, who has been visiting at the home of his parents for a few days, returned to Calgary yesterday.

Mrs. W. F. Pratt, Forsyth and Edna, left last Sunday morning en route to the coast, where they will spend a month's vacation.

Mr. and Mrs. G. P. Freebury and family and Mrs. J. C. Desso left last Monday for Calgary.

Dr. S. Holt of Lloydminster, was an Oyen visitor the latter part of last week.

Jack Horn, Jr., of Rosetown, is visiting at the home of his grandmother, Mrs. W. H. Horn of Cappan. He was a guest at the home of Mr. and Mrs. G. H. Langmuir before leaving for the country.

Summer Fair and Stampede

The Oyen Agricultural Society have decided in favor of holding the annual summer fair and stampede. The dates have been set for July 28-29, and preparations are now being made to make the fair a success.

Faced with the lack of government support in the form of its customary grant, the wisdom of holding a fair was questioned by some, but others decided that it was better to hold the fair and stampede as usual rather than drop out of the picture entirely.

In order that the annual event may pay its way in spite of the unusual conditions, a general reduction has been made to the amounts offered in the prize list, and prize money will be paid only on a per centage basis to the extent of the money available. As an example if the prizes won totalled \$10,000.00 in the prize list, and only \$750.00 is available for distribution, the individual prize winner will only receive 7.5 per cent of the amount of the prize shown in the list.

Other towns along the line have cancelled their fairs, but it's felt that given loyal support by exhibitors, who are willing to enter in true co-operative spirit, and being favored with a large attendance, the Oyen fair and stampede can be made and will be a success. Since the stampede was inaugurated, it has been steadily improved each year and become a great drawing feature. No effort will be spared to make it an outstanding event on this occasion.

Prize lists will be mailed to members this week. Anyone desiring a copy of the 1932 prize list should apply to Mr. J. P. Roraback, secretary, Oyen.
